

Delve Into

The Unmet Needs of Neuroscience

Three days. Three symposia. One exciting journey of discovery.

On the 6th EAN annual congress, Sanofi Genzyme proudly invites you to join us on our 3-day virtual satellite symposia, where the brain takes centre stage.

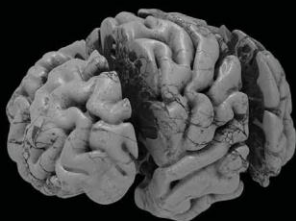

Day 1: Saturday, May 23, 10.00 – 10.30

Will the real MS please stand up?

Prof. Gavin Giovannoni, UK

A different perspective.

View MS progression from a different perspective, focusing on the emerging concept of smouldering MS and addressing the unmet need in terms of treating MS.

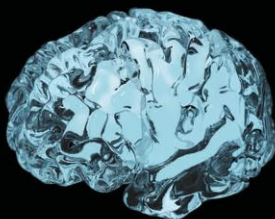

Day 2: Sunday, May 24, 13.15 – 13.45

A brain-first perspective in MS

Dr. Jens Wuerfel, Switzerland

Digging deeper.

Shift focus to specific brain structures, looking at how they are affected over the course of MS and the predictive value in clinical practice.

Day 3: Monday, May 25, 13.15 – 13.45

Brain penetrance, the new road to take?

Dr. Erik Wallström, USA. R&D Department Sanofi Genzyme

A new dimension.

Take a close look at the role of brain penetrance as a new area of focus in neuroscience drug development.

The symposium sessions will be available on the EAN website www.eanvirtualcongress.org and online-participation will be free of charge during these days. After the congress the sessions will be available on demand for EAN members only.
